

Pressure Distribution Head-to-Toe®

Pluma-Soft®

by NinoMed, LLC

Uniquely Designed for:

- Patient Positioning
- Infection Barrier
- Pressure Ulcer Prevention
- OR Table and Equipment Protection

WITH PADDED
SAFETY STRAP

TAKE THE GUESS WORK OUT OF PRESSURE ULCER PREVENTION STRATEGIES,
GET COVERED HEAD-TO-TOE!

HEAD-TO-TOE

Pluma-Soft® is designed to:

- Easily **position a patient** on a surgical table.
- Use foam to help stabilize a patient and **prevent pressure ulcer formation** by reducing uneven pressure distribution.
- Protect the arms and hands with integrated foam **arm board covers**.
- Reduce the risk of infection with an integrated **infectious barrier** that isolates the patient from the OR table.
- Keep OR table clean and **reduce turnover time** by using a protective sheet.

TRADITIONAL SOLUTION

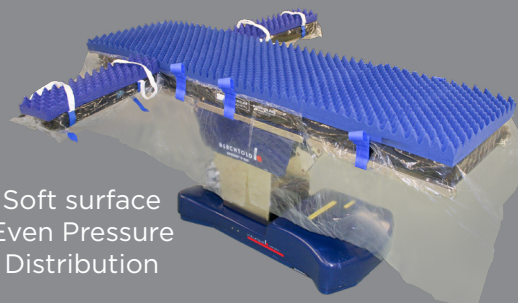

VS

SIMPLE, INTEGRATED SOLUTION

Uneven pressure distribution and hard surface

Soft surface
Even Pressure Distribution

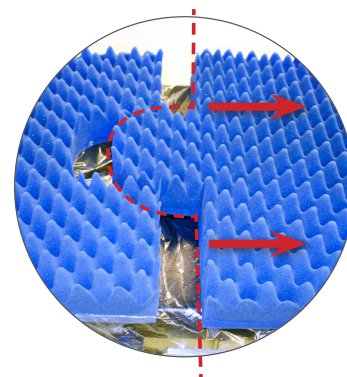

Take the guess work out of pressure ulcer prevention strategies, **get covered Head-to-Toe!**

Don't try and PREDICT where a pressure ulcer MAY form by placing a variety of foam dressings over the POTENTIAL area. Skip the guesswork and easily address difficult areas (such as the back of the head), by using Pluma-Soft®, a simple one-step solution to cover 'Head-to-Toe'.

Pressure ulcers are considered by Medicare as "Never Events". These are publicly reported quality outcome measures.

TOP-TO-BOTTOM

Pluma-Soft easily converts to Top-to-Bottom for lithotomy positioning by removing the foot section and adding stirrups.
